

Manufacturer, Trader & Exporter of Advance Vacuum Consumables

Earth Composites Pvt. Ltd. is one of the leading Indian manufacturer which is a huge capacity of producing facility in all range of vacuum infusion consumable at vapi-gujarat & Odisha, India. ECPL is the leading manufacturer in the rapidly growing Composite Industry & focus is on delivering durable & high performance-driven solutions with a competitive price, that meet the demanding requirements of modern wind blade manufacturers. ECPL delivering advanced composite solutions tailored for the wind energy and other industries. A complete package with technical support.

ECPL provides advanced composite solutions for its customers worldwide. We have gone through the root beyond basic requirements to ensure a complete solution. Earth Composites Pvt. Ltd. specializes in the supply of vacuum bagging film, spiral tube, feeding hose, polyamide tubes, peelply, perforated release film and non-perforated, knitted mesh, infusion mesh, breatherable fabric, vacuum valve, tee connector, paint rollers, spring hose, sealant tape, and other plastic consumables. Vacuum infusion-related products to the advanced composites industry.

Sustainable Materials with an Innovative Solutions

Earth Composite Pvt. Ltd. known as ECPL having an extensive experience in composite manufacturing, we offer a wide range of products including blades components and Consumables along with engineering parts. Our focus is on delivering durable & high performance- driven solutions with a competitive price, meet their standards with & extensive range, meet the demanding requirements of modern wind blade manufacturer, Drowns, marine, aircraft, Aeronautic, Defence, Railway, Metro, ships etc.

ECPL also engaged in engineering solutions with mechanical parts, blade rotor parts and other engineering solutions.
